What's Next for Africa?

- Current challenges and future scenarios

An opportunity to learn about African perspectives on the future. What are the most important challenges for policy making vis-a-vis Africa? What are the issues that put the focus back into Africa? How can Africans gain the control they should have over the economic development, the social justice agenda, and the future for people in Africa? After short inputs from a few guests with extensive knowledge about and experience from various African countries we will open up for questions and discussion.
